WORK EXPERIENCE

AngelHacks Organizer Director Of Tech
2019–2019

Successfully organized a hackathon in Los Angeles to help computer science education, raising over \$15,000 total with 130+ participants.

Hack The Fog Tech Team
2019–2020

The first high school hackathon to ever happen in San Francisco with 70+ attendees helping increase the amount of tech education inside of San Francisco.

PROJECTS

Smart Recycle

This is an app that uses machine learning and image recognition to help people sort their recycling between trash, recycling, and compost. This project is on the App Store and won 2nd place in the statewide Science Fair.

Marker

This is an easy way for people to shorten URL's or even just make a fast website. This stores the link and a password, so you can edit it, and either redirects you to a link, or shows a markdown document.

RegHack

A self-hosted website that people can use to keep track of their hackathon attendees, allowing for simple QR code check-in, using MongoDB and allows for mass mailing.
